Two weeks ago WENT for a DRIVE with him, twice Stopped told ME to get out NON STOP TEXT, PHONE CALLS COMING where I am, Threatening Friends, Threatening to get rid of My things

He called me & wanted me to come over & told him NO. He said if I did not come over he would come to my house & wake everyone up. He told me it was the only one he could talk to. He acted like he was going to kill himself. So after an hour of him threatening to kill me, while I was never

Struck me under my eye with a hand Gun. THEN I had to go to the emergency room to get stitches

He went on a tirade including threatening to kill me, while kicking door violently. Threatened to shoot me and my family burn my house down

I want this injection because he said then there's no reason to live, has also forced sex upon me within the last month.

with him he always left guns laying around with clips in them, he would always play with them like running the bullets through the chamber. I was never able to get a license, phone or anything w/out his consent always told me I was not able to go & get my license "what's stopping you" but he would not let me out to get it. If I made arrangements to go get it he would disappear not able to be found so I could go - had to watch my kids.
